

PURCHASING POLICY

As Senior Management of Granada Luxury Hotel & Convention Center Belek;

In order to provide the best quality service, which is our main goal, we need the support of all our collaborators, we evaluate and make purchases by considering the following issues.

We undertake;

- To pay attention to the fact that the type of electricity use is A - C class in the purchase of electrical devices in our business,
- Local suppliers will be used primarily in the purchases made by our business, and if there is a significant price and quality difference between local suppliers and other suppliers, to prefer others,
- To introduce the local products and traditions to the guests,
- To pay attention to the fact that the product to be purchased is environmentally friendly and economical, to pay attention to the quality standards of all purchased products, to request quality certificates from the supplier (at the time of the first purchase),
- To prefer large-scale, large-packaged, recyclable, and generating as little waste as products possible,
- To prefer devices that use environmentally friendly gas and save A class electricity in the air-conditioning devices to be purchased in our facility,
- To prefer environmentally sustainable products produced in a sustainable way/provided from sustainable sources,
- To work with companies that have fulfilled all legal requirements on environment and energy.
